Be Seen, Be Heard, Ride Hard

OUR PEOPLE, OUR MISSION

We are a tight knit team of riders, gear heads, outdoor enthusiasts, and full blown adrenaline junkies who are passionate about the products we design and use. We work hard, we play hard and we want to make it home in one piece.

DENALI was founded on one simple goal which remains our mission to this day; **to provide innovative lighting & safety solutions that will help you be seen, be heard, and ride harder without have to sacrifice your safety.**

WHY CHOOSE DENALI

DENALI is built for riders who demand safety, performance, and reliability. Our ultra-bright lights, loud horns, and smart controllers keep you seen and in control. With compact, high-output designs, plug-and-play OE integration, and modular systems like CANsmart and TriOptic lenses, we deliver unmatched visibility and versatility. **Trusted from back roads to the world's harshest environments, DENALI gear is made to perform—anywhere, anytime.**

SAFETY FIRST

Be seen, be heard, stay safe. It's what we do, it's why we created DENALI. Life on two wheels (& four) is dangerous - which is why it's so damn fun! Our products are created and engineered to help you push your limits without sacrificing your safety.

UNPARALLELED PERFORMANCE

Our quest to develop ultra compact lighting for Powersports applications forced us outside the status quo and resulted in our proprietary construction and optic design that enables us to outperform competitors lights twice our size.

INTELLIGENT LIGHTING CONTROL

Say goodbye to old-school on / off only. Our DataDim enabled light pods paired with our smart lighting controllers give you unparalleled control over your electronics and unlock smart features and settings that automatically adapt auxiliary lighting to your vehicle and your environment.

OE INTEGRATION

We offer more plug-&-play wiring solutions and vehicle-specific light and horn mounts than any other brand, and we don't stop there. Our CANsmart technology allows us to read vehicle data in real time to deliver a seamless aftermarket experience that doesn't just meet OE standards but exceeds them.

MODULAR BY DESIGN

Our TriOptic interchangeable lens system, DRL visibility line, and T3 switchback turn signal line are just a few examples of how our modular design philosophy can deliver infinitely more solutions for any vehicle type from a simple set of well thought out components.

DURABILITY DNA

Designed for NASA, abused in the mines in South Africa, and proven on the washboard highways in Alaska. Our high-stakes commercial and industrial customers demand nothing short of indestructible when used 24-7 in the most extreme environments on earth.

Premium Innovative Products

LED Lighting

See more of the road in front of you while driving at night

SoundBomb Horns

Command attention and avoid unnecessary accidents

Switches & Controllers

Consolidates all your accessory wiring and control into one intelligent unit

Vehicle-Specific Solutions

Plug-and-play upgrades to maximize visibility and control

Complete Solutions

Complete plug-and-play lighting and safety solutions for forward lighting, rear lighting, aftermarket horns, and intelligent lighting & accessory controllers.

Passionate Staff Lifetime Support

Our customer service team is made up of passionate riders who bring real-world experience and expert advice to every conversation. Whether you're customizing your first bike or upgrading gear, they're here to help—because they live the ride, too.

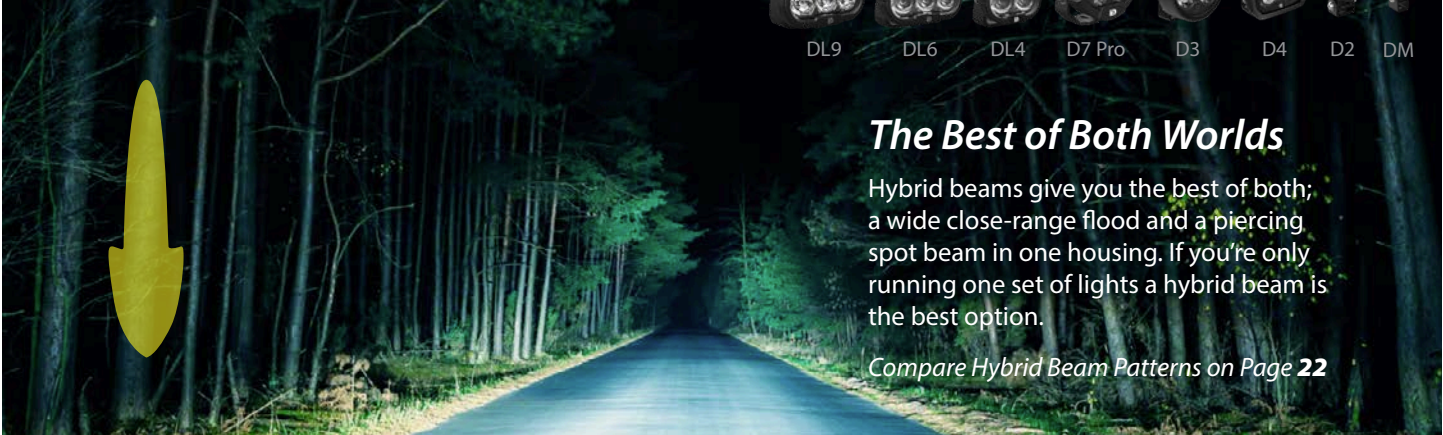

SIGNATURE BEAM PATTERNS

No matter where or how you ride, the right beam pattern makes all the difference. From wide-angle flood lights for low-speed maneuvering to long-distance spot beams built for speed, each beam type is engineered to match specific driving needs.

Hybrid Beam

Opt for this beam to combine spot and flood patterns, delivering balanced visibility both up close and down the road.

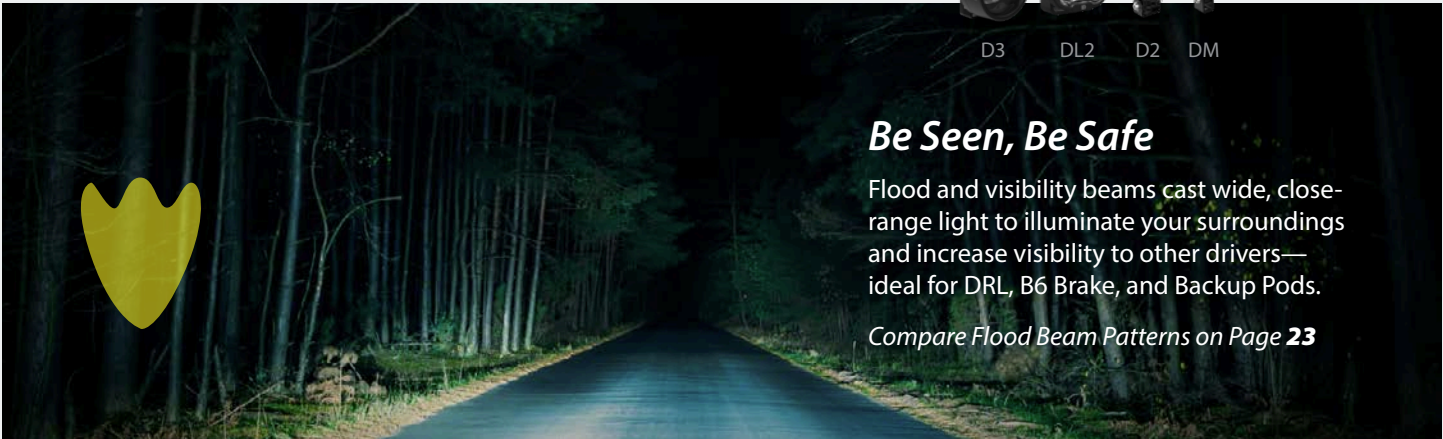

The Best of Both Worlds

Hybrid beams give you the best of both; a wide close-range flood and a piercing spot beam in one housing. If you're only running one set of lights a hybrid beam is the best option.

[Compare Hybrid Beam Patterns on Page 22](#)

Elliptical Flood / Visibility Beam

Choose this beam for wide-angle coverage that delivers exceptional visibility in close to mid-range distances.

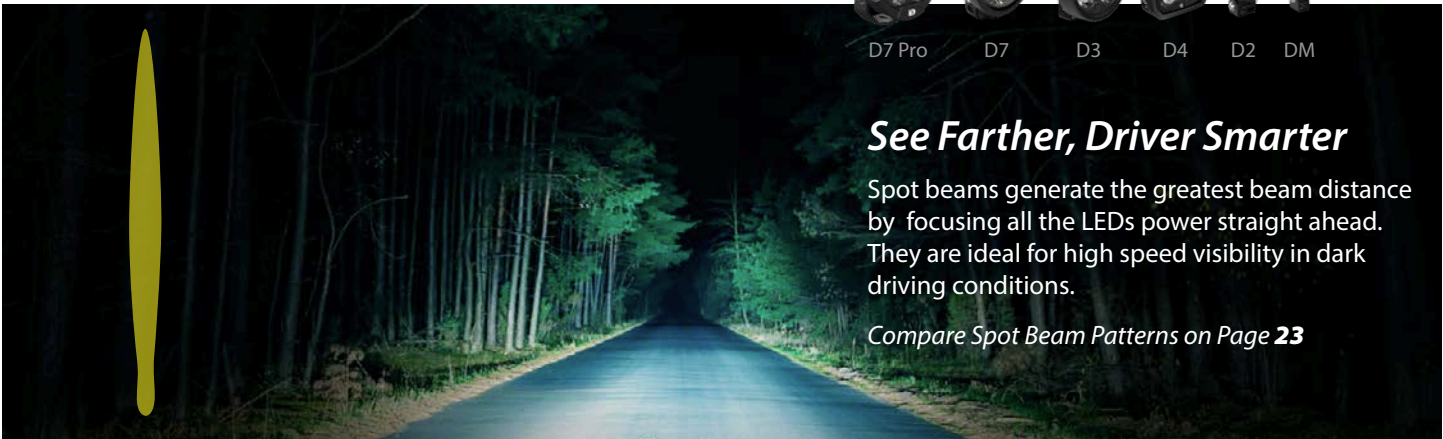

Be Seen, Be Safe

Flood and visibility beams cast wide, close-range light to illuminate your surroundings and increase visibility to other drivers—ideal for DRL, B6 Brake, and Backup Pods.

[Compare Flood Beam Patterns on Page 23](#)

Spot Beam

Select this beam for focused, long-range light that delivers maximum visibility down the road at night.

See Farther, Driver Smarter

Spot beams generate the greatest beam distance by focusing all the LEDs power straight ahead. They are ideal for high speed visibility in dark driving conditions.

[Compare Spot Beam Patterns on Page 23](#)

LIGHTING TECHNOLOGY

This next generation of DENALI lighting is engineered for riders who demand more—from brightness and beam control to durability and ease of installation. Featuring powerful Cree Hi-Intensity LEDs, our signature TriOptic™ Lens System, and innovations like DataDim™ and DrySeal™ technology, the 2.0 series redefines what auxiliary lighting can do. Whether you're riding through storm, dust, or darkness, DENALI 2.0 lights are ready for the challenge—right out of the box.

TriOptic™ Multi-Beam Lens System

Included in 2.0 Light Kits

2.0 light kits include two spot lenses and two elliptical flood lenses giving you three unique beam patterns in one kit. Use two spots for maximum distance, two elliptical floods for maximum spread, or one of each for the best of both worlds.

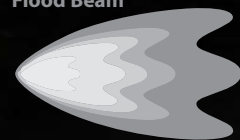

Spot Beam

True-Hybrid™ Beam

Flood Beam

DataDim™ LED Dimming Technology

All 2.0 light pods are equipped with a dedicated 3rd-wire dimming circuit so we can use an external signal to reliably control the intensity of the LED chip at the source. Plug in our DataDim™ Controller (sold separately) to enable the DENALI lights to switch between half and full intensity with your vehicle's original high beam switch.

Engineered for Performance

DENALI 2.0 lights are built with high-output LEDs, a plug-and-play modular harness, ultra-tough bezels, and smart thermal management—delivering brighter, cooler, and more reliable lighting on every ride.

HiDrive™ LEDs
20% more light with no extra power draw.

HotSwap™ Harness
Quick-swap ready for dual-intensity control

Impact PCTM Bezels
Rust-proof, fade-proof, impact-resistant.

LiveAction™ Cooling
Real-time heat control for peak LED performance

DrySeal™ Waterproof Protection

From light pods to switches, our DrySeal™ technology uses potted wire cavities and molded gaskets to create a fully submersible, watertight seal—engineered to endure the harshest riding conditions. Flush or bar mount the rugged, illuminated switch included with every kit.

AUXILIARY DRIVING & FOG LIGHTS

LIGHT THE WAY. OWN THE NIGHT.

DENALI LED Driving and Fog Lights are engineered to deliver unmatched brightness, durability, and control—whether you're navigating city streets, rural highways, or off-road trails. From compact visibility pods to powerhouse driving beams, our light lineup ensures you're seen and can see—no matter the conditions.

D7 PRO SERIES

Dual-Beam Driving Lights
with Modular X-Lens System

D7 PRO SERIES

Insane Performance + Unmatched Features

This compact light features flood and spot control, snap-on lens options, DRL Boost, turn signal mode, and smart DialDim or CANsmart control—all in one kit.

DRL / Flood / Turn White Spot Only All-On Hybrid Beam

Customizable Performance

Picture the most powerful 4" driving light ever built, then add a flood beam and a spot beam, a multi-color DRL mode, fully dimmable circuits, and the option to change the beam shape and beam color on the fly. That's the D7 PRO, and it looks even better than it sounds.

Clear X-Lens
SKU: DNL.D14.050-01

Yellow X-Lens
SKU: DNL.D14.050-03

Amber X-Lens
SKU: DNL.D14.050-02

Infinitely More Versatile

The center circuit delivers a white DRL for daytime visibility, an amber DRL with turn signal sync, and a powerful flood beam for foggy or dusty conditions—all without glare.

Product Features

- 11,900 lumens from 7 HiDrive LEDs with TIR optics
- Independent flood, spot, or hybrid beam modes
- Quick beam and color changes with X-Lens system
- DRL boost for adjustable center beam intensity
- Amber DRL flashes with turn signal sync
- Works with CANsmart and DialDim for full control

D7 Pro Series

Dual-Beam Driving Lights
with Modular X-Lens System

Single Lamp Specifications:

Raw Lumens: 11,900 per pod
 LEDs: 7x 14W Cree XML3 LEDs
 Watts / Amps: 98W / 8A
 Voltage: 9-32 VDC
 Size: 4.4" round x 2.9" deep
 Weight: 1.8 lbs
 Approvals: IP68/69K, ECE R112

SINGLE SKU: DNL.D7P.050

D SERIES

LED Driving Lights with
DataDim™ Technology

Unmatched Versatility

DENALI D-Series lights are engineered for versatility, making them ideal for both V-Twin cruisers and ADV motorcycles. Their rugged design and powerful output ensure optimal visibility no matter where you ride.

Balanced Visibility

The D Series lights were engineered to deliver powerful beams that strike the balance between long-distance visibility at night and enhanced conspicuity during the day. Their compact design and optimized optics make them ideal for riders who want reliable performance around the clock.

More Flexibility

Choose from standard or premium harnesses with waterproof or illuminated switches for dash or handlebar mounting—ideal for basic or upgraded installations.

Product Features

- High-Output 10W Cree LEDs
- TriOptic lenses offer spot, flood, and hybrid
- DataDim provides smart three wire dimming
- DrySeal provides waterproof protection
- Impact resistant PC bezels for durability
- LiveActive system manages thermal regulation
- Low profile mounts with stainless hardware

Maximum Control with DialDim™ & CANSmart

D Series lights are compatible with standard Denali harnesses but can also be paired with our smart controllers to deliver a fully dimmable and customizable lighting experience.

D7 Pod Lights
LED Driving Lights with DataDim™ Technology

Pair Specifications:

Raw Lumens: 15,330
LEDs: 14x 10W Cree XPL HI LEDs
Watts / Amps: 140W / 10A
Voltage: 12 VDC
Size: 4.4" round x 2.9" deep
Weight: 1.8 lbs
Approvals: IP67, E Mark
Compatibility: DataDim

DL SERIES

LED Driving Lights with
DataDim™ Technology

DL SERIES 

Overbuilt, Not Overpriced

Our 4mm thick powder-coated steel brackets & robust heatsink enable an impressive 21grms vibration rating, while our Polycarbonate lenses are reinforced with UV hard coating.

Maximum Performance, Minimal Cost

Built from a decade of rider feedback, the DL Series delivers premium beam performance, unmatched durability, and smart dimming—at a price that fits any rider's budget. A single-piece TIR optic and sealed housing cut costs without sacrificing quality, giving you more light per dollar.

Product Features

- HiDrive 8W CREE LEDs
- Hybrid driving beam with oversized TIR optics
- DataDim dimming with plug and play capability
- Waterproof DrySeal construction
- Durable steel brackets and rugged lenses
- ECE compliant clear lens high beam

Affordable Lights for Affordable Bikes

Engineered based on a decade of customer feedback, our DL Series Driving Lights are purpose-built to deliver best-in-class beam performance, unmatched durability, and our signature dimming technology at a price point that is more approachable to new riders, younger riders, and our rapidly growing international customer base!

Choosing a Beam Color

White offers maximum brightness and reach for clear conditions. Amber and yellow cut through fog, rain, and dust, with amber enhancing contrast and yellow providing a classic off-road look. Choose based on your environment and preference.

Slip-On Blackout Covers

DL Slip-On Blackout Covers provide a quick and easy way to block light output when needed. Perfect for trailering, storage, or areas with strict lighting regulations, these durable covers slide securely over DL Series pods for a clean, stealthy look.

DRIVING BEAMS

A Comparison Guide for Spot, Flood, and Hybrid Driving Light Beam Patterns

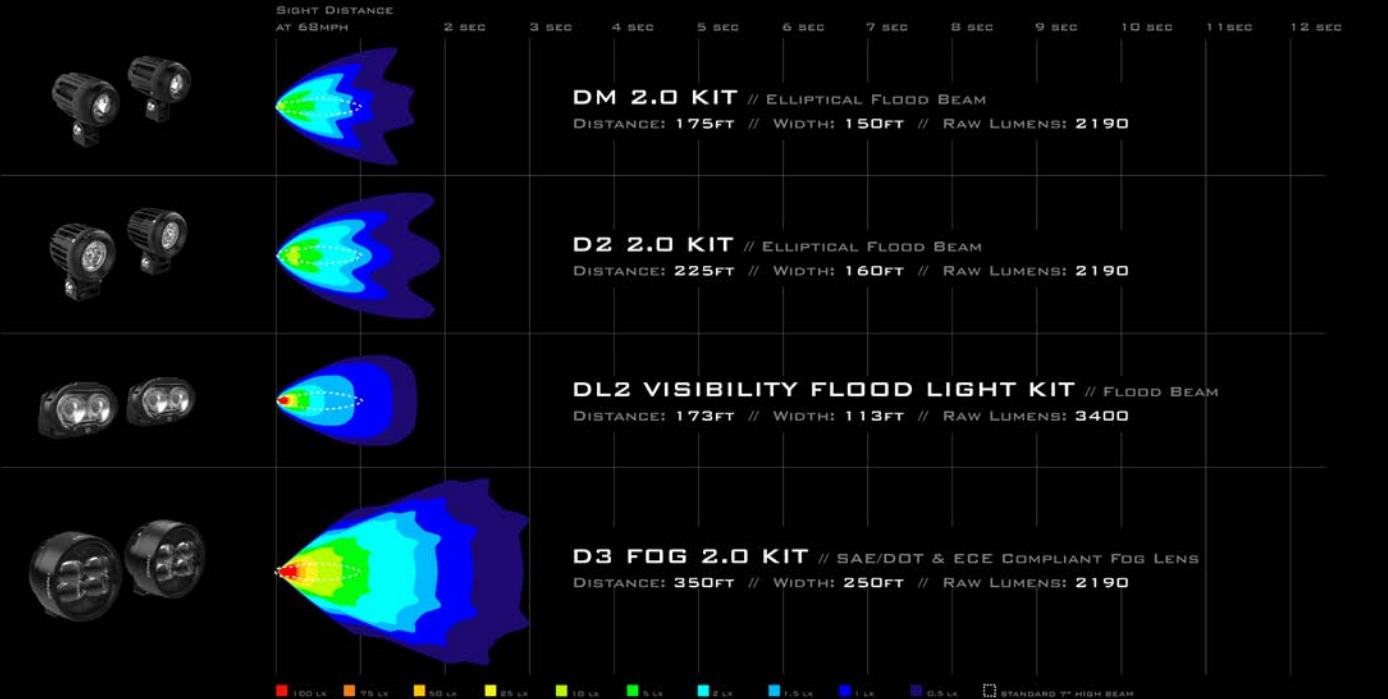

Hybrid Beam Patterns

Spot Beam Patterns

Flood Beam Patterns

MOUNTING SOLUTIONS

Flexible Mounting Options for Any Setup

Upper Fairing Mounts

Vehicle-Specific

This vehicle-specific upper fairing mount provides a secure, high-visibility location for driving lights. Designed with a durable steel bracket and clamp system, it attaches directly to the fairing support and includes an M8 mounting hole plus all required hardware.

Available for most ADV and Sport Touring models. See full SKU application list starting on page 100.

Example Vehicle-Specific Fairing Mount

Lower Fairing Mounts

Vehicle-Specific

This vehicle-specific lower fairing mount offers a stable, low-profile position for smaller driving lights. Built with heavy-duty steel brackets, it mounts securely to the lower fender and includes an M8 mounting hole along with all necessary hardware for easy installation.

Available for most ADV and Sport Touring models. See full SKU application list starting on page 100.

Desert X Example Vehicle-Specific Fairing Mount

Engine Guard / Crash Bar Mounts

Universal Fit

These low-profile mounts make it easy to add lights to 7/8" - 1.5" engine guards or crash bars. Built for a factory-style look, they feature durable construction, adjustable clamp design, and offer clean cable routing for a rugged, custom finish.

21-29mm: LAH.00.10300.B

32-38mm: LAH.00.10400.B

Fork Tube Mounts

Universal Fit

These versatile mounts allow you to securely attach lights or accessories to motorcycle fork tubes. Designed for a low-profile, factory-style look, they feature durable construction and include all necessary hardware for a clean, streamlined installation.

39-49mm SKU: LAH.00.10600.B

50-60mm SKU: LAH.00.10500.B

Fender & DIY Mounts

Universal Fit

These fender mounts provide a secure and low-profile location for installing lights or accessories directly on your motorcycle's front fender. Built from durable materials and designed for a clean, integrated look, they offer easy installation and reliable performance.

NEXT-LEVEL
●●●●

CANsmart™ Controller

Ultimate Integrated Control Over All Lighting

Simply connect the CANsmart™ Controller to your motorcycle diagnostic port to access over 35 programmable accessory settings that provide intelligent control of auxiliary lights, horns, brake lights, or any other accessory you can imagine.

DialDim™ Specifications

- High/Low Sync
- ON/OFF and Dim
- Stealth Mode
- Cancel Or Flash W/ Turn Signal
- Plug & Play Horn Installation
- Strobe with Horn
- Electronically Fused Circuits
- Voltage Display Indicator
- Low Voltage Cutoff

CANsmart™ Specifications

- Over 35 Customizable Settings
- High/Low Sync
- ON/OFF and Dim
- Modulate Lights
- Flash to Pass
- Strobe with Horn
- Cancel Or Flash W/ Turn Signal
- Plug & Play Horn Installation
- Deceleration Activated "Smart Braking"
- + More

CANsmart™ CONTROLLER

Seamless Integration for Ultimate Control

Auxiliary Lighting

LED aux lights and DRLs offer settings like dimming, strobe, modulation, and turn signal cancel.

Brake & Turn Lighting

The intelligent brake circuit offers multiple flash patterns and smart brake deceleration activation.

Horns & Safety

Easily connect a SoundBomb™ horn without a relay and sync your aux lights to strobe with the horn.

Other Accessories

In accessory mode, power devices like a phone charger, GPS, or heated gear. Each output delivers up to 25 peak amps.

Ground-Breaking Control

Our ground-breaking CANsmart™ Controller provides plug-and-play installation for up to four accessories, enabling dozens of customizable settings that can be controlled directly from your vehicle's handlebar controls or via our Accessory Manager Software.

Intelligent Accessory Control

Independently control and dim up to two sets of LED lights right from the BMW wonder-wheel. Click the turn signal cancel three times to turn lights on/off, or hold the wonder-wheel left/right to enter dimming mode where you can scroll between 10% - 100% intensity.

4 Accessory Circuits, Over 35 Custom Features & Settings

Simply connect the CANsmart™ Controller to your vehicle's connector to access over 35 programmable accessory settings designed to control auxiliary lights, turn signals, horns, brake lights, or any accessory you can imagine.

Control OEM accessories, 3rd party accessories or use the included wiring harnesses for plug & play connection to DENALI driving lights, DRLs, SoundBomb Horns and B6 Brake Lights.

CANsmart™ Accessory Manager Software

Our free Accessory Manager Software lets you set each of the four circuits to control what ever accessory type you want. Once selected, you can choose between dozens of features and settings to customize each accessory type to match your riding style. You can also set each circuits electronic fuses which, if tripped, will automatically reset with a cycle of the ignition.

SCAN
To Download Software

Auxiliary Light Features

High-Low Sync

Auto-switch lights between high/low with factory high beam.

Modulate Lights

Flash lights during the day to boost visibility.

Turn Signal Integration

Auto-cancel or flash lights with turn signals for clarity.

On-Off & Dim

Independently control two light sets with adjustable brightness.

Flash to Pass

Triple-tap high beam to strobe lights for attention.

And Many More...

See website for all CANsmart lighting features!

Horn Features

Plug & Play Installation

Quickly and easily connect high power aftermarket horns like our SoundBomb™ without having to add an additional harness or relay.

Strobe with Horn

With this feature selected the CANsmart™ will automatically strobe your passing lamps or auxiliary lights when you sound your horn. This feature works whether you have the factory horn or SoundBomb™ horn installed.

Other Features

Switched Power

Provides 12V power that turns on/off with ignition.

Delay Timeout

Option to keep accessories powered up to 30 seconds after shutdown.

Device Power

Ideal for GPS, phones, heated gear, and other electronics.

Accessory Harness Included

In addition to the CANsmart™ controller, our kit includes four additional wiring harnesses that enable plug & play connection of two sets of auxiliary lights, SoundBomb™ horns and auxiliary brake lights.

Brake Light Features

“Smart Brake” Activation

Triggers brake lights during deceleration—before you touch the brake—with adjustable speed and sensitivity settings.

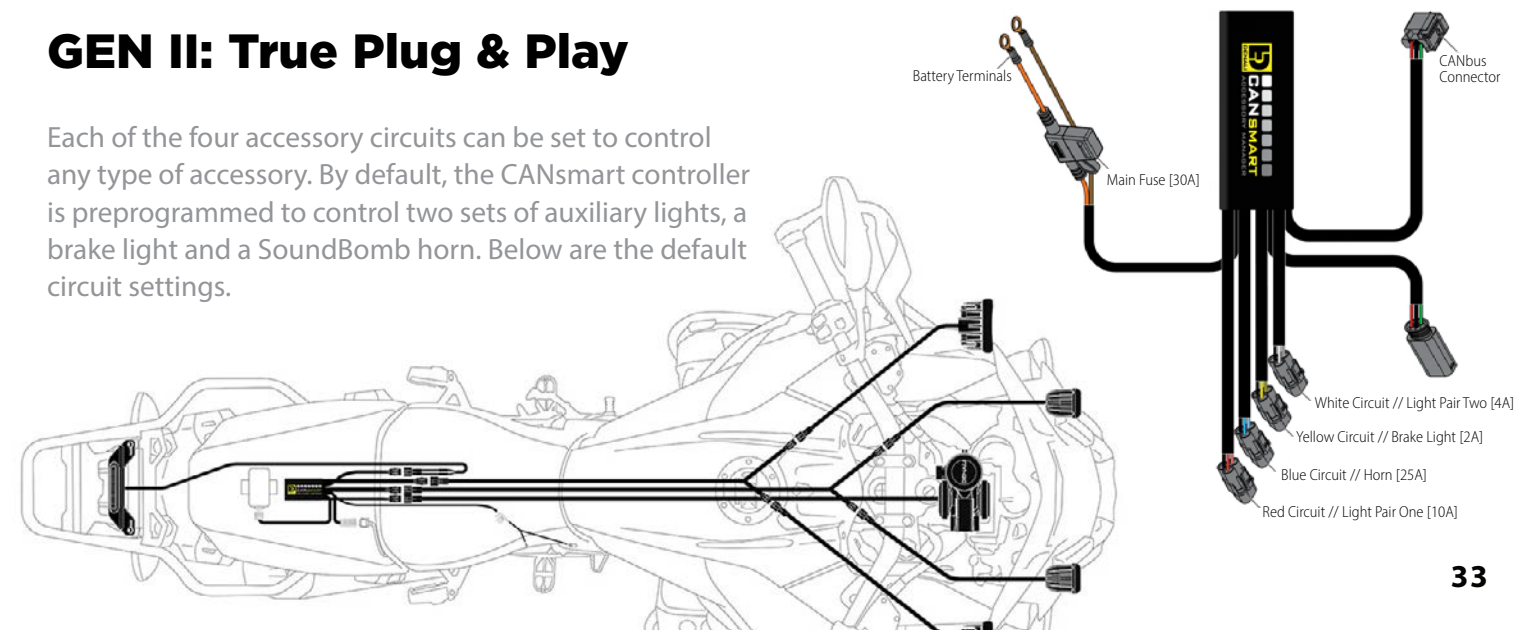

Flash Pattern Braking

Choose from four flash modes to boost rear visibility, including hard brake flash, continuous flash, or California-legal 4-flash pattern.

GEN II: True Plug & Play

Each of the four accessory circuits can be set to control any type of accessory. By default, the CANsmart controller is preprogrammed to control two sets of auxiliary lights, a brake light and a SoundBomb horn. Below are the default circuit settings.

We offer a fully universal version the uses universal signal wires (illustrated below) as well as fully plug-&-play version that includes a vehicle-specific harness to effortlessly connect to your bikes ignition, high beam, turn signal, and horn circuits.

One Switch, Two Circuits, Infinite Control

Our ground-breaking DialDim™ Lighting Controller features a multicolor halo switch that lets you independently control and dim two sets of auxiliary lights through a single wiring harness. The LED halo displays real-time settings—blue for one circuit, green for the other—and allows effortless dimming on the fly. Simply double-click to toggle between circuits.

It also integrates with your high beam, turn signal, and horn to unlock smart functions like turn signal canceling, signal flashing, and horn-triggered strobing.

Harness Overview

The labeled, color-coded outputs make it easy to connect two light sets—blue leads for main lights, green for fog or visibility lights. Just connect the ring terminals to the battery, the white wire to a switched power source, and optional inputs to your high beam, turn signal, or horn circuits for advanced features.

The kit includes the controller, switch, four 5-foot plug-and-play light extensions, and a handlebar mount. Just add light pods and you're ready to ride.

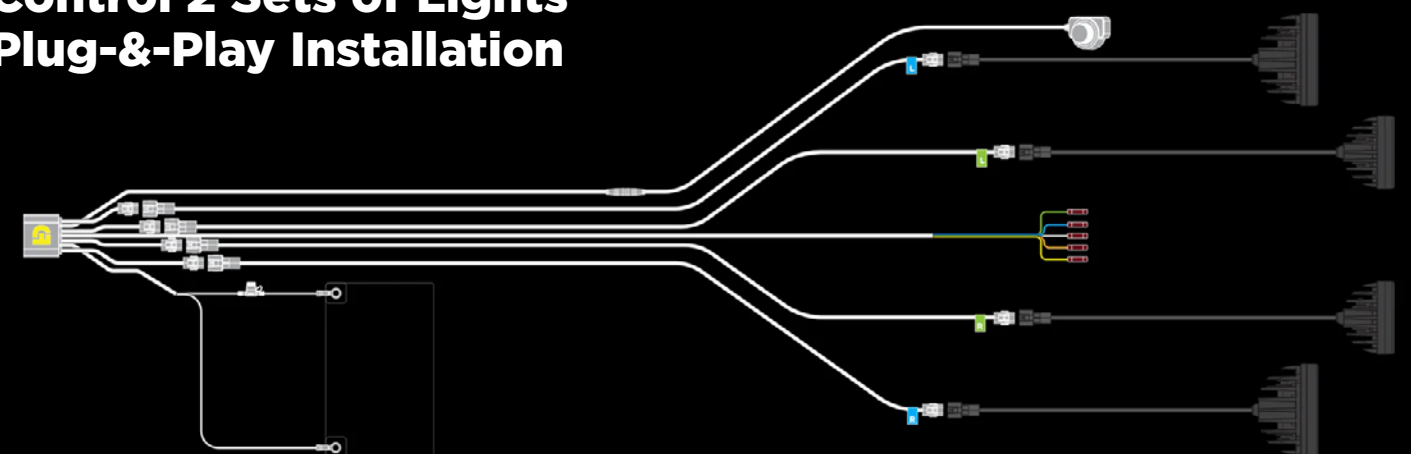

More Features, More Feedback

Our patent-pending multicolor halo dimmer switch does more than just control brightness—it clearly displays the intensity level of both light circuits, so you're never left guessing.

Electronically fused circuits let you view and set fuse values, with real-time red halo alerts and reset capability if a fuse trips. The halo also functions as a battery monitor, flashing different colors on startup to indicate battery health and automatically shutting off lights below 10.8 volts to protect your system.

Control 2 Sets of Lights Plug-&-Play Installation

Our Unique Features

- On/Off & Dim**
Control and dim two light sets with one switch.

High/Low Sync
Auto-switch from dim to full with high beam input.

Stealth Mode
Lights stay off until high beam, horn, or turn signal is activated.
- Cancel with Turn Signal**
Main lights auto-cancel when signaling.

Flash as Turn Signal
Amber lights flash with turn signals.

Strobe with Horn
Lights strobe when horn is used.
- Fused Circuits**
Built-in fuses with red halo alert for trips.

Voltage Indicator
Halo flashes green (good) or red (low) on startup.

Low Voltage Cutoff
Auto shutoff below 10.8v to protect battery.

Operating the Multi-Function Switch

- The switch functions are easy to remember, but we went ahead and printed it on the back of the controller housing anyway (just in case you forget)!
- Light Set One:** Single click ON --> Press & Hold OFF
- Light Set Two:** Double Click ON --> Press & Hold OFF
- Switch Between Circuits:** Double Click
- Fuse Setting Mode:** 7 second hold ENTER --> 2 Second Hold EXIT

Intuitive Display Reading

The DialDim™ switch uses colored halos to indicate system status. Green or red flashes on startup show battery voltage, with four red LEDs signaling low-voltage cutoff. Solid blue or green indicates which light set is active. A red halo shows a tripped fuse; hold the switch for 7 seconds to enter fuse setting mode, shown by flashing blue or green.

To enter fuse setting mode, press and hold the switch for 7 seconds until the circuits flash, then use the dial to select one of eight fuse values, double-click to switch circuits, and hold for 2 seconds to exit.

DataDim™ & HARNESSES

Seamless Plug-&-Play Dimming Control

DataDim™ Control Smart Light Upgrade

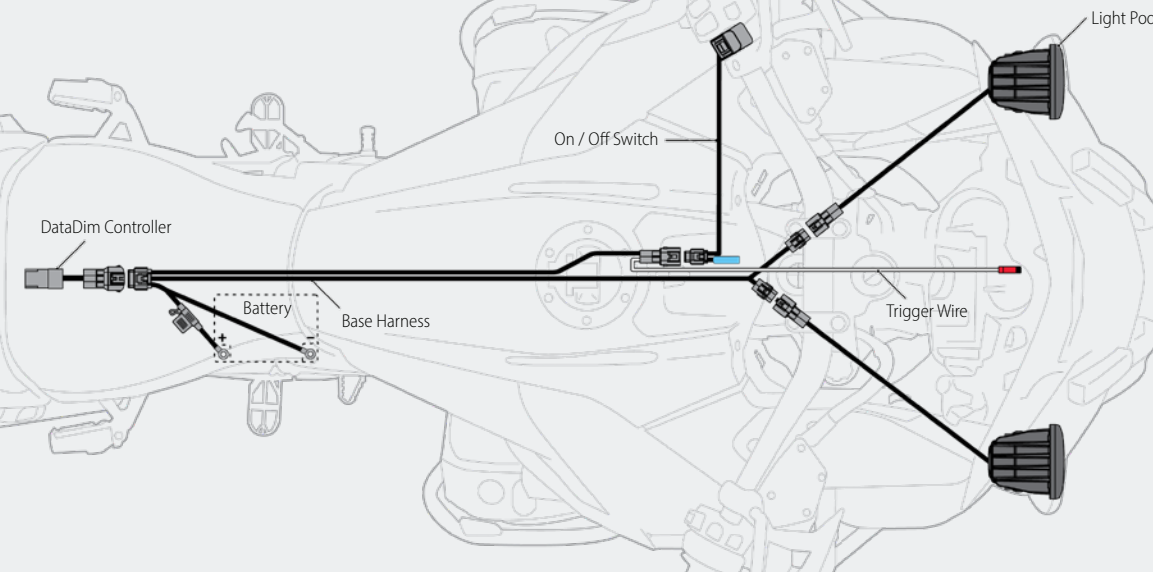

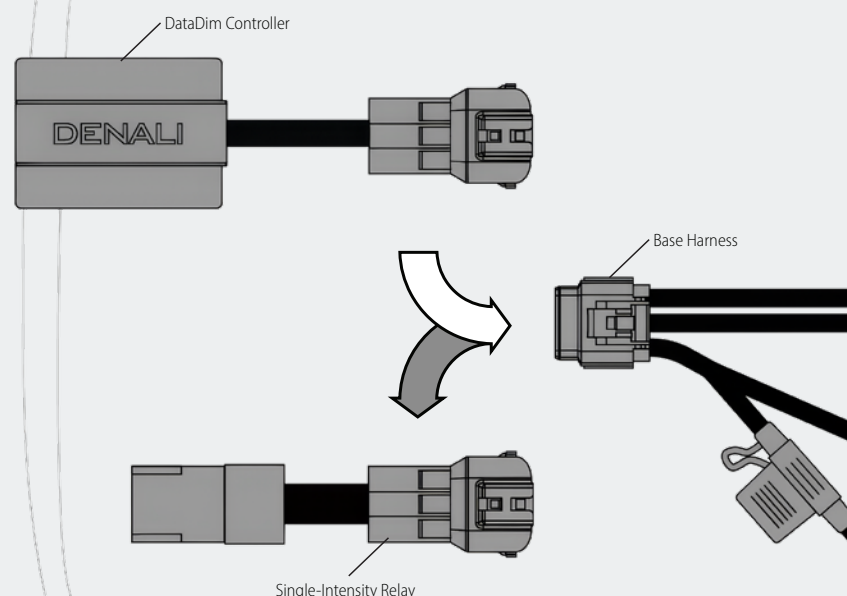

Effortlessly upgrade your single-intensity lights to dual-intensity with the DataDim™ Controller. This plug-and-play module syncs with your high beam to automatically switch lights between low and high intensity—no rewiring or extra switches needed.

SKU: DNL.WHS.11000
Compatible with Standard, and Premium Harnesses

DataDim™ Easy Plug & Play Upgrade

Easily upgrade your DENALI wiring harness using the built-in HotSwap™ design—just remove the included single-intensity relay and plug in the DataDim™ Dual-Intensity Controller (sold separately). Compatible with both standard and premium harnesses, this quick-swap setup allows seamless control of low/high beam intensity using your factory high beam switch. Switches are interchangeable for even more flexibility.

LED HEADLIGHTS

BOLDER, BRIGHTER, BUILT TO DOMINATE

DENALI's LED Headlight Systems are engineered to completely transform your visibility, safety, and style—on any bike, in any environment. Whether you're upgrading your Harley-Davidson Road Glide, replacing your passing lamps, or outfitting a Husqvarna enduro for off-road adventures, our headlight kits deliver unmatched performance and plug-&-play simplicity.

D14 DESTROYER

Next-Generation Multi-Function
Motorcycle Headlight System

Unrivalled Output Seamless Installation

Imagine a super rugged 12,900 lumen DOT headlight with unmatched beam performance, then add a stylish linear low beam, two different high beam intensity options and a modular lens system that lets you change the color of your low beam on the fly. We did, and it just destroyed the status quo.

Available in Universal & Vehicle-Specific Kits

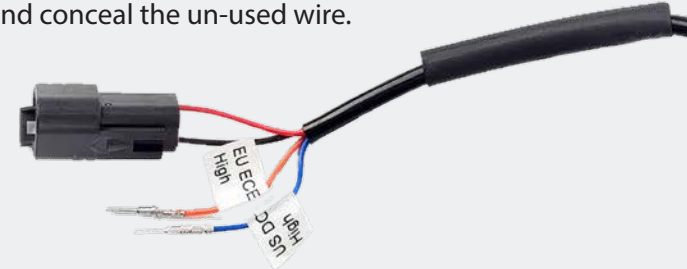

Product Features

- Modular X-Lens System changes low beam color
- Dual High Beam with DOT or Destroyer mode
- DOT and ECE approved for street use
- 25,800 lumens per pair for full output
- Universal or integrated multi mount design
- Slim profile fits tight Harley applications
- CISPR25 rated to prevent interference
- Tool free beam adjustment
- IP69K waterproof with sealed cable entry

Dual High Beam, DOT & ECE

The D14 offers a DOT and ECE approved high beam from the same headlight. Simply push your selected high beam wire into the waterproof DT connector and use the pre-applied heat shrink to secure and conceal the un-used wire.

Complete Headlight Kits

Available for popular Harley-Davidson, Indian, Scrambler, and Enduro applications. Kits include vehicle-specific mounting brackets, hardware, and plug-&-play wiring harnesses.

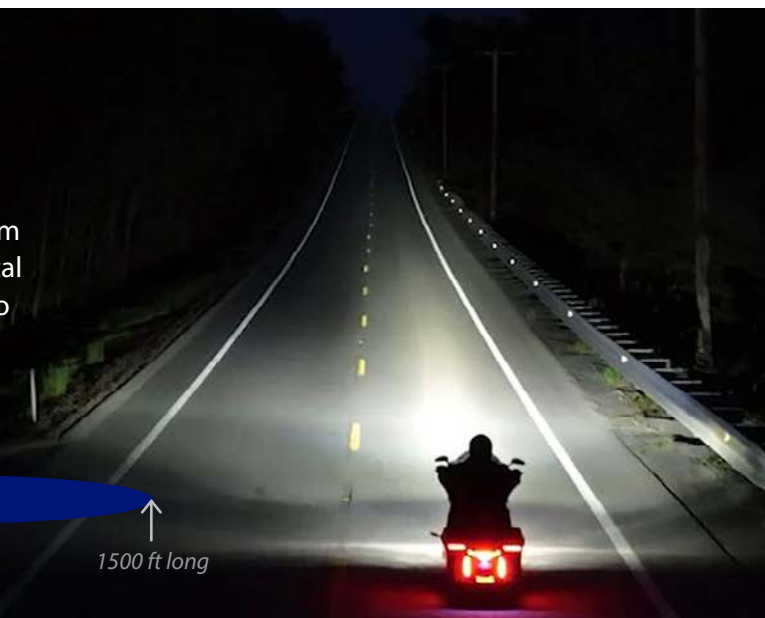

Example Harley-Davidson Road Glide Kit

Barely Legal

DOT compliant if you want it, or a 1500-foot destroyer high beam if you don't - how is this possible? Thanks to our advanced optical design capabilities, and some clever innovation, we were able to provide two user-selectable high beam circuits pre-pinned and labeled for either USA DOT or European ECE performance.

Off-Road Ready

The Destroyer was created from our signature off-road DNA and features a universal mounting platform with reinforced M8 mounting points purpose built to enable endless mounting possibilities in scramblers, enduros and custom-built motorcycles.

D3 Modular Headlight Pods

DOT Street Legal

Pod Specifications:

Lumens: High 2,100 / Low 2,500

LEDs: High 3x XP-P / Low XP-P

Watts / Amps: High 36w | 3A / Low 20w | 1.7A

Voltage: 9-32 VDC

Size: 3.5" round x 3" deep

Weight: 1.9 lbs

Beam: High/Low

Approvals: SAE/DOT & ECE R149, IP68/69K, R10, CISPR 25, CE, UKCA

SKU (LOW BEAM): DNL.D3.052

SKU (HIGH BEAM): DNL.D3.050

Product Features

- Complete Plug-&-Play Headlight Upgrade Kit
- Over 36,000 total lumens
- Dual High Beam Design (DOT high beam OR Destroyer high beam)
- DOT/SAE & ECE street-legal high/low
- Modular X-Lens System
- Ultra-slim Profile
- IP68 & 69K Waterproof, Submersible, & High-pressure Spray

Product Features

- SAE/DOT & ECE approved beam patterns
- Off-road performance, street legal beam
- Universal 90mm round housing profile
- Unlimited applications in rally towers, scramblers and custom builds
- DrySeal provides waterproof protection
- Impact resistant PC bezels for durability
- LiveActive system manages thermal regulation
- Low profile mounts with stainless hardware

ENDURO

Low-Profile LED Rally Headlight Kits

Slim Fit Serious Performance

Add powerful, low-profile LED lighting to your Enduro with a perfect OEM fit. Each kit includes a D4 or D7 pod, plug-&-play wiring, and DataDim™ high/low beam control—built for brighter, longer-lasting performance on any trail.

Available in Vehicle-Specific Kits

Product Features

- Plug and play DataDim™ high/low control
- Precision 3D scanned OEM headlight fit
- Reliable PWM dimming reduces power and heat
- Rugged frame with steel and aluminum build
- Optional amber and yellow lenses for visibility
- Easy install with no wiring mods
- Adjustable beam aiming on the fly

M SERIES

LED Headlight & Passing Lamp Modules

Plug-&-Play LED Headlight Upgrades

The DENALI M Series brings modern performance to classic headlight sizes with plug-&-play LED upgrades for 4.5", 5.75", and 7" sealed beam housings. Designed for greater visibility and a clean custom look, each module features a powerful beam pattern, integrated halo DRL, and rugged, waterproof construction wrapped in a sleek black chrome finish.

Available in Vehicle-Specific Kits

Product Features

- Direct OEM replacement for 4.5, 5.75 & 7" lights
- Plug-&-play install with H4 or H9 H11 connectors
- Premium LEDs with 50,000 hour lifespan
- Durable aluminum housing with IP68 waterproof
- Halo daytime running light for extra visibility
- Modern black chrome finish
- E Mark compliant beams on 5.75 & 7" models
- Improves visibility and safety in all conditions

DOT-Approved Visibility

The DENALI M Series headlights feature powerful high and low beams designed to dramatically improve nighttime visibility. The M5 and M7 models are fully DOT approved, delivering a wide low beam and a piercing high beam for optimal road coverage. Each module also includes a bright halo daytime running light to enhance daytime visibility and safety, giving riders added confidence on every ride.

M SERIES

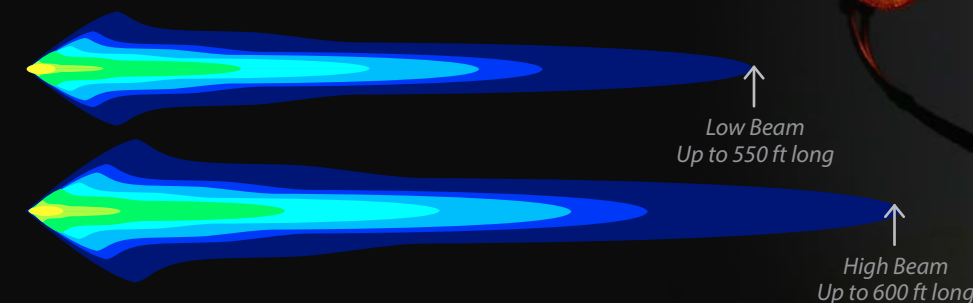

Easy Installation & Rugged Housing

M Series lights install easily with plug-and-play connectors and require no modifications. Available in 4.5", 5.75", and 7" sizes, each module is housed in a tough, waterproof aluminum casing with a sleek black chrome finish built to withstand the elements.

Beam Control & Customization

DENALI optics shine up to 3x farther than halogens and 2x farther than standard LEDs. Add the All-On Adapter to keep the low beam on with high beam for maximum visibility while staying DOT compliant.

Off-Road Ready

The Destroyer was created from our signature off-road DNA and features a universal mounting platform with reinforced M8 mounting points purpose built to enable endless mounting possibilities in scramblers, enduros and custom-built motorcycles.

All-in-One Visibility

The M-Series delivers powerful low and high beams, plus a bright halo DRL, offering enhanced visibility for day and night riding.

Wiring Adapters

M Series headlights connect easily using standard H4 or H9/H11 plug-and-play adapters for quick, hassle-free installation.

M7 DOT LED Headlight Module

Harley-Davidson, Kawasaki, Triumph, Yamaha

Single Lamp Specifications:

Lumens: 1,830 high, 1,760 low, 620 halo
LEDs: 2x Cree XML, 1x Philips Altilon C-4, 2x Cree XPG2, 30x Philips Luxeon 3014
Watts: 19W high/low, 6W halo
Voltage: 9-32 VDC
Size: 7" round
Beam (Single): 600' high, 550' low
Approvals: IP68

SKU: TT-M7

LED VISIBILITY LIGHTING

BRAKE LIGHTS, TURN SIGNALS, & DRLs

DENALI's Visibility Lighting lineup is purpose-built to maximize your presence on the road and trail. From ultra-bright T3 Switchback Pods that combine running, brake, and turn signal functions, to sleek DRLs and compact B6 Brake Lights, each product is designed for low-profile mounting and all-day visibility. Whether you're upgrading your hand guards, license plate area, or fairing, DENALI offers versatile lighting solutions that enhance safety without compromising style.

62. T3 Switchback Turn Signals

66. B6 Brake Lights

68. Modular DRLs

70. Micro Turn Signal

T3 SWITCHBACK

All-in-One Visibility, Turn, & Brake Lighting

Modular Design, Ultimate Versatility.

T3 Switchback Signal Pods pack ultra-bright white, red, and amber LEDs into a sleek, modular design—delivering unmatched visibility and versatility for front and rear mounting. Brightest in class, plug-and-play ready, and built for maximum safety.

Product Features

- Switchback: DRL & turn or brake & turn in one
- Dual Intensity: 50% low, 100% high
- Six High-Power LEDs per pod
- 180° wide-angle visibility
- Sleek, low-profile design
- E-Mark approved, street-legal
- Plug-&-play with CANsmart™ or direct wiring
- Versatile mounting on hand guards, bars, & fenders

M8 Stud Mounting Option

The T3 Single Pod replaces factory motorcycle turn signals with a sleek, compact upgrade. Featuring a durable stainless steel hollow M8 mounting stud, it bolts directly onto most brackets. Despite its small size, each pod delivers ultra-bright white DRLs, amber turns, or red brakes—boosting visibility and safety with a clean, minimalist look.

T3 SWITCHBACK SERIES

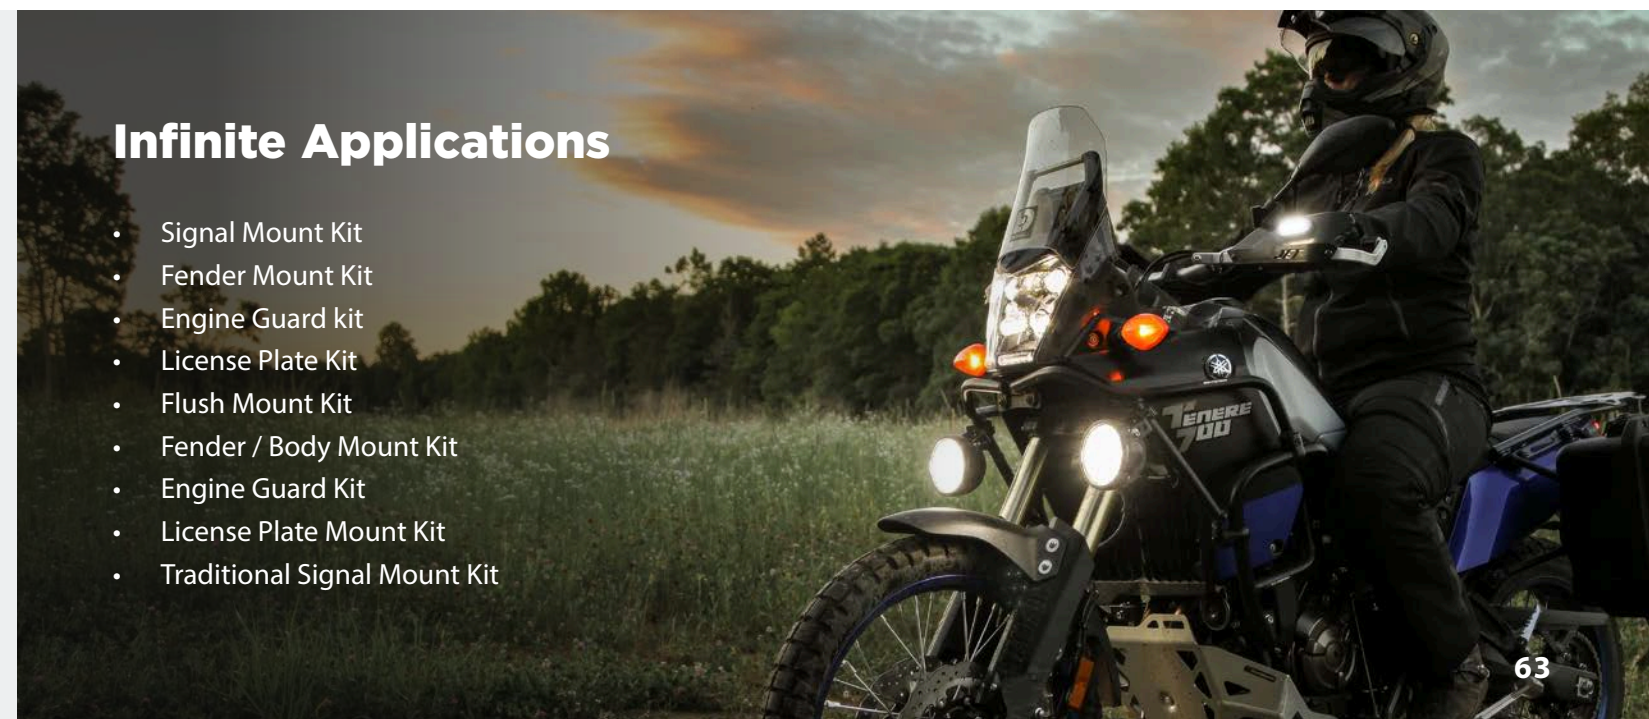

Switchback Functionality

We reinvented the turn signal with an ultra-bright amber signal, integrated white DRL up front, and red brake light in the rear. Its modular design pairs with various mounting kits for flush, signal, fender, bar, or license plate installs, front or rear. All functions are E-Mark approved.

Infinite Applications

- Signal Mount Kit
- Fender Mount Kit
- Engine Guard kit
- License Plate Kit
- Flush Mount Kit
- Fender / Body Mount Kit
- Engine Guard Kit
- License Plate Mount Kit
- Traditional Signal Mount Kit

Bright & Versatile

With compact housings, flexible mounting, and direct replacement options, they deliver unmatched brightness, safety, and style for any setup.

Mount It Your Way:
Versatile Front & Rear Signal Pods

The T3 Turn Signals and Signal Pods offer brilliant white, red, and amber LEDs in a sleek, compact design. Whether you prefer direct replacement or custom mounting, these pods are built for flexibility—making it easy to install them wherever visibility matters most.

B6 LED LIGHTS

Low-Profile Brake Lights,
Integrated Run/Brake Circuit

Brake Bright. Ride Safe.

The B6 Brake Light is purpose-built to deliver maximum brightness from a sleek, low-profile design that virtually disappears when installed. With an integrated run-brake circuit and 50/100% intensity modes, the B6 enhances visibility and safety without sacrificing style. Compatible with multiple mounting options and plug-and-play with the DENALI CANsmart™ Controller, the B6 is the brightest, smartest auxiliary brake light available—ideal for riders who demand performance and clean design.

Product Features

- Dual intensity: 50% running, 100% brake

MICRO TURN SIGNALS

*Perfect Turn Signal Upgrade
for Custom & Sport Bikes*

MICRO TURN SIGNALS SERIES 

Micro Turn Signals

Perfect Turn Signal Upgrade for Custom & Sport Bikes

Single Pod Specifications:

LEDs: 2 per signal, flip chip C3535 3W

Watts: 6W per signal

Voltage: 12 VDC

Size: 1.45" x 0.73" x 0.55"

Approvals: IP67

SKU: ALG.001

Ultra Compact. High-Output.

Developed with Analog Motorcycles, DENALI's Micro Turn Signal Pods deliver big brightness in a tiny, low-profile housing—ideal for custom and sport builds. Each pod features dual 3-watt LEDs and an angled lens for excellent side visibility. Flush mount them or use as auxiliary signals for a clean, modern look without compromising function.

Micro Turn Signal Spacer Kit

SKU: ALG.003

Spacer Kit for Clear, Low-Profile Mounting

This spacer kit offsets Micro Turn Signals by one inch, ensuring they clear obstructions like license plates or body panels for maximum visibility. Designed for a clean, low-profile install, the kit fits both M8 and M6 mounts and includes all components to install two signals.

Product Features

- Compact design for custom and sport bikes
- Dual 3-watt amber LEDs per pod
- Angled lens enhances side visibility
- Durable satin black aluminum housing
- Flush mount or use as auxiliary turn signals
- Fits factory signal locations or custom installs

Form-Fitting Versatility

Engineered with a custom-friendly shape, these pods seamlessly align with OEM signal mounts for an ultra-clean factory fit. Whether you're updating your stock signals or adding visibility to hand guards or panniers, the Micro Pods adapt effortlessly to your build with style and precision.

SOUNDBOMB™ HORNS

BE HEARD. STAY STYLISH.

The DENALI SoundBomb Series delivers up to 120 decibels—four times louder than stock horns—for riders who need to be heard. Built for durability with a blacked-out finish, SoundBomb horns come in Compact, Split, Mini, and V-Twin kits for Harley and Indian bikes. All models offer plug and play installation, CANsmart compatibility, and rugged performance in high-vibration environments.

74. SoundBomb Horns

75. Universal Mounts & Wiring

SOUNDBOMB™ SERIES

Louder than Stock. Built to Last.
Designed to Blend In.

Maximum Volume. Minimal Footprint.

Designed for riders who refuse to go unnoticed, DENALI SoundBomb Horns deliver up to 120 decibels of attention-grabbing sound—four times louder than stock. With compact, durable housings and sleek blacked-out finishes, they blend seamlessly into your bike while offering plug-&-play installation and CANsmart compatibility. Loud, rugged, and stylish—everything a motorcycle horn should be.

Product Features

- Loud output ranging from 113-120 decibels
- Operates on 12V systems
- Stylish all-black design (chrome for select models)
- Fits most factory horn locations (varies by model)
- CANbus compatible (Original and Split models)
- Power draw varies by model from 5 to 20 amps
- Compact dimensions for easy installation
- Available in single-piece or two-piece designs

GLOBAL CERTIFICATIONS

At DENALI, we engineer high-performance auxiliary lighting without compromising legality. Whether you’re upgrading for visibility, safety, or both, it’s important to ensure your lights meet regional regulations. Our products are tested to meet global safety standards, with certifications like DOT and ECE, so you can ride confidently on-road and off. Here’s what you need to know about staying compliant—and protected.

DOT-Compliant for U.S. Roads

Meets Federal Motor Vehicle Safety Standard (FMVSS) 108.
Ensures lights are safe, durable, and legal across U.S. states.
Marked with SAE identifiers for easy verification.

Legal Use of Light Covers

Required for oversized or bright aux lights.
Must be fully opaque for compliance.
DENALI Slip-On Covers ensure legality and protection

ECE / E-Mark for International Use

Approved by the Economic Commission of Europe.
Minimizes glare for safe oncoming visibility.
Required for road use in many European countries.

Ride Anywhere, Stay Informed

Lighting laws vary widely by location.
Use certified lights and covers to stay road legal.
DENALI guides riders through regional lighting laws.

SKUs	Approval Type	Regulation Description
D14 Destroyer Headlights		
DNL.D14.050	E4*10 Device or system pursuant to Regulation No. 10	ECE Regulation R10 covers the requirements regarding the immunity to radiated and conducted disturbances related to direct control of the vehicle, the driver, passenger and other road users' protection. The regulation addresses disturbances which would cause confusion to the driver or other road users, related to vehicle data bus functionality.
DNL.D14.050	E4*1149R01/03*0332*00 Device or system pursuant to Regulation No. 149	Uniform provisions concerning the approval of motor vehicle headlamps emitting an asymmetrical passing-beam or a driving-beam or both and equipped with filament lamps and/or light-emitting diode (LED) modules.
D7 Pro Driving Lights		
DNL.D7P.050	E9*149R00/07*1675*00 Device or system pursuant to Regulation No. 149	Uniform provisions concerning the approval of motor vehicle headlamps emitting an asymmetrical passing-beam or a driving-beam or both and equipped with filament lamps and/or light-emitting diode (LED) modules.
CANsmart Controller GEN I & II
